

### SCHOOL/WORK PATHS

Although these three paths are typical plans that most students participating in the Cooperative Education and Internship Program (CEIP) follow, individualized study/work plans can also be developed. These individualized plans require the pre-approval of the faculty coordinator, the department chairperson, the director of the CEIP, and the associate dean of the College of Engineering.

#### Requirements/Policies:

- 2.75 GPA to start work placements;
- 2.75 GPA to remain in the program;
- A minimum of three work placements is required, i.e., the equivalent of twelve months of full-time work;
- No more than five work placements are allowed;
- At least one of the work placements must be a non-summer work term;
- Placements begin after the completion of the coursework required in the calculus-ready sophomore year curriculum of the participating student’s major;
- Two approved internships may substitute for one work placement.
